(208)881-4290 | Olympia, WA | Britneyartemis@gmail.com | <https://www.linkedin.com/in/britneyaconley>

I like helping people and solving problems, and have a lifelong love of technology.

Active Projects

Both made in TypeScript-ed React

Idleitaire.com

Github

Idleitaire – A version of Solitaire made into an idle game, meaning as you play you get points, spend points to buy upgrades, and with those upgrades the game starts to play itself increasing in speed with subsequent purchases, leading to more points being accrued faster. Persisting the users data and settings with local storage.

CarverVO.com

Github

CarverVO – A portfolio/work showcase website made for my friend that is a narrator. Showcasing samples of her work.

Past Projects

LazyVeganRecipes

Made in C#

Project Git Repo

LazyVeganRecipes — A recipe hosting site. Anyone can post a new recipe and admins can have their own front page of recipes made up of recipes they have posted as well as recipes chosen from the user submitted recipes. Full rating, liking, sorting, and commenting system, as well as having a profile page listing the recipes that a user has liked.

QuindittyArt

Made in Python

Project Git Repo

QuindittyArt — Art gallery website made for a friend's art with comments, likes, admin privileges which allow admins to post new artwork with titles and descriptions, upload and change the websites main backgrounds, change the color and opacity of section's backgrounds, delete posts, delete users, make users admins, and remove them as admins

Education History

Full Stack Web Development, Coding Dojo, Online Bootcamp

2019
